Solutions to the Capital Budgeting Example. This is a comprehensive example, that shows you all the steps and issues involved. For each capital budgeting problem, the goal is to get to the Cash Flow from Assets, or, in the case of project evaluation, the Cash Flows from the Project. This is done by looking at all relevant and incremental cash flows, on an after-tax basis, that are directly associated with the project.

Problems and Solutions - Oregon State University

A capital budgeting process is the set of procedures we want to follow throughout the analysis of a potential capital budgeting process. For example, generating ideas is part of the process. A capital budgeting technique refers to the way we evaluate whether or not the capital budgeting project being evaluated should be accepted or not.
