Il existe de nombreux datums, chacun adapté à un usage particulier, depuis des représentations globales du globe (ce sont les plus précises, ... Flattening the Earth: Two Thousand Years of Map Projections., University of Chicago Press, 384p.

Projection cartographique — Wikipédia

The invention of a geographic coordinate system is generally credited to Eratosthenes of Cyrene, who composed his now-lost Geography at the Library of Alexandria in the 3rd century BC. A century later, Hipparchus of Nicaea improved on this system by determining latitude from stellar measurements rather than solar altitude and determining longitude by timings of lunar eclipses, rather than dead ...
