Department Of Temporal Investigations Forgotten

The USS Enterprise (NCC-1701-C), sometimes referred to as the Enterprise-C, was a Federation starship, an Ambassador-class heavy cruiser in service to Starfleet in the mid-24th century. In the year 2344, the Enterprise and her crew sacrificed themselves to save a Klingon outpost from a Romulan attack; this had the effect of boosting the deteriorating relations between the Federation and the ...

As you seem to have forgotten the 1976 Swine flu vaccine, the last time the Government tried to fast track a vaccine. That vaccine, had to be withdrawn after only between 3 & 53 deaths ,depending what reference source you use. Contrast that with the noticable lack of media coverage and action for the current situation.

Electroencephalography (EEG) is an electrophysiological monitoring method to record electrical activity on the scalp that has been shown to represent the macroscopic activity of the surface layer of the brain underneath. It is typically non-invasive, with the electrodes placed along the scalp. Electrocorticography, involving invasive electrodes, is sometimes called intracranial EEG.

Electroencephalography - Wikipedia

INTRODUCTION. Migraine is a common complaint in the pediatric population. It is a hereditary disorder with a multifactorial inheritance pattern: when interviewing both parents of a child, at least one of them gives a history of migraine in over 90% of cases. 10% of children aged 5-15 years have

The purpose of this study was to present the evolution of views on epilepsy as a disease and symptom during the 19th and the 20th century. A thorough study of texts, medical books, and reports along with a review of the available literature in PubMed was undertaken. The 19th century is marked by the works of the French medical school and of John Hughlings Jackson who set the research on ...

Highlights in the History of Epilepsy: The Last 200 Years

The temporal synchronization of neuronal activity is an important part of the representation (e.g., Deiber et al. 2007, Jensen 2006, Lisman & Idiart 1995). As time passes, variability in the firing rates of individual neurons may cause them to fall increasingly out of synchrony unless they are reset (e.g., by rehearsal).
