### Freshwater Prawns Biology and Farming - Aquaculture

A freshwater prawn farm is an aquaculture business designed to raise and produce freshwater prawns or shrimp<sup>1</sup> for human consumption. Freshwater prawn farming shares many characteristics with, and many of the same problems as, marine shrimp farming. Unique problems are introduced by the developmental life cycle of the main species. The global annual production of freshwater prawns in 2003 was about 280,000 tons, of which China produced some 180,000 tons, followed by India and Thailand with some 3

## **Freshwater prawn farming - Wikipedia**

Freshwater shrimp, also called Malaysian prawn, are the species *Macrobrachium rosenbergii*, originally from Malaysia. These are relatively easy to aquaculture, but require large ponds with excellent filtration and water quality. Many shrimp farms have successfully employed a three-pond grow-out system, allowing for three harvests a year.
