Simon is an electronic game of memory skill invented by Ralph H. Baer and Howard J. Morrison, working for toy design firm Marvin Glass and Associates, with software programming by Lenny Cope. The device creates a series of tones and lights and requires a user to repeat the sequence. If the user succeeds, the series becomes progressively longer and more complex.

Simon (game) - Wikipedia

Newton's laws of motion are three physical laws that directly relate the forces acting on a body to the motion of the body. The first law states that every object in a state of uniform motion tends to remain in that state of motion unless an external force is applied to it.
