Motor Trade Theory N1 Book
An alternative fuel vehicle is a motor vehicle that runs on alternative fuel, an energy other than traditional petroleum fuels (petrol or Diesel fuel); the term also refers to any technology of powering an engine that does not involve solely petroleum (e.g. electric car, hybrid electric vehicles, solar-powered vehicles).Because of a combination of factors, such as environmental concerns, high ...

Alternative fuel vehicle - Wikipedia
Let's say you have a collection of Car objects (database rows), and each Car has a collection of Wheel objects (also rows). In other words, Car → Wheel is a 1-to-many relationship. Now, let's say you need to iterate through all the cars, and for each one, print out a list of the wheels.

What is the "N+1 selects problem" in ORM (Object ...
XFN 1.1 relationships meta data profile Authors. Tantek Çelik; Matthew Mullenweg; Eric Meyer; As described in HTML4 Meta data profiles.. rel. HTML4 definition of the 'rel' attribute. Here are some additional values, each of which can be used or omitted in any combination (unless otherwise noted, and except where prohibited by law) and their meanings, symmetry, transitivity and inverse if any.

Instead of going into maths I'll try to put it in plain words. If you have the whole population at your disposal then its variance (population variance) is computed with the denominator N.Likewise, if you have only sample and want to compute this sample's variance, you use denominator N (n of the sample, in this case). In both cases, note, you don't estimate anything: the mean that you ...
