Natural Law Theory Contemporary Essays

Natural law (Latin: *ius naturale*, *lex naturalis*) is a system of law based on a close observation of human nature, and based on values intrinsic to human nature that can be deduced and applied independent of positive law (the enacted laws of a state or society). According to natural law theory, all people have inherent rights, conferred not by act of legislation but by "God, nature, or reason."

Natural law - Wikipedia

Contemporary "positivist" theories are, it seems, natural law theories, distinguished from the main body of natural law theory (a) by their denial that the theory of law (as distinct from the theory or theories of adjudication, judicial duty, citizens' allegiance, etc.) necessarily or most appropriately tackles the related matters just ...

Natural Law Theories (Stanford Encyclopedia of Philosophy)

When we focus on the recipient of the natural law, that is, us human beings, the thesis of Aquinas's natural law theory that comes to the fore is that the natural law constitutes the basic principles of practical rationality for human beings, and has this status by nature (ST I-II 94, 2).

Natural selection is the differential survival and reproduction of individuals due to differences in phenotype. It is a key mechanism of evolution, the change in the heritable traits characteristic of a population over generations. Charles Darwin popularised the term "natural selection", contrasting it with artificial selection, which in his view is intentional, whereas natural selection is not.
