Stevens A Lowe J Human

There is a demonstrated link between exposures to infectious microorganisms present in built environments and human health. In a number of cases, the mechanisms of transmission are well understood, but more can be learned about how built environment design influences proliferation or transmission of such infectious microorganisms.

Microorganisms in Built Environments: Impacts on Human ...

2.2. Carbohydrate. The low carbohydrate content of the soybean means that many traditional Asian soyfoods are also low in this macronutrient which may make them advantageous for people with diabetes [].Also, much of the soybean carbohydrate is comprised of oligosaccharides (predominately stachyose) [33,34,35,36], which, because they are poorly digested by intestinal enzymes, travel to the ...
