The Nature Of Qualitative Evidence

For many claims in qualitative research it seems to us that qualitative data as evidence are evidence of a claim in the sense of providing for a (possible) sufficient condition. That is, much of the evidence produced by qualitative research methods entails a type of inference known as enumerative induction (Barker, 1989), whereby as many "positive" instances as possible are collected.

The Nature of "Evidence" in Qualitative Research Methods

The authors first examine the status of qualitative research as evidence versus "opinion." They then examine such topics as: who decides what counts as evidence, the nature of outcomes, how to evaluate qualitative evidence, constructing evidence within the qualitative project, and research utilization and qualitative research.
