If the transmission fluid level on your Matrix is low, you need to add fluid through the dipstick tube. Toyota has been developed sophisticated transmissions through years and it is critical that you add the exact type of transmission fluid stipulated by your owner's manual (typically in the back of the manual in a section titled Fluid Capacities.) When adding transmission fluid to your Matrix, be sure to add it slowly as the transmission fluid capacity is reached quickly and it is difficult ...

The manual transmission Toyota Corolla requires 75W-90 GL-4 transmission fluid. I use and recommend the Red Line MT-90. In order to fill the transmission fluid, we need to get a funnel that can enter in the fill port. I use a long transmission fluid funnel, and put a little extra piece of hose on the end to make the bend.

When adding transmission fluid to your Matrix, be sure to add it slowly as it will fill up quickly and is difficult to remove excess fluid if you overfill. If you are having problems with the transmission in your Matrix, such as clunky shifting or hesitation, check the fluid level first - it is amazing how many drivers pay thousands of dollars for transmission work when a half quart of transmission fluid would have fixed the problem.
